

**Truly custom designed
With precision & perfection**

Propeller

Propeller — High Performance

Our Partner companies are always with us.

Designed with Precision

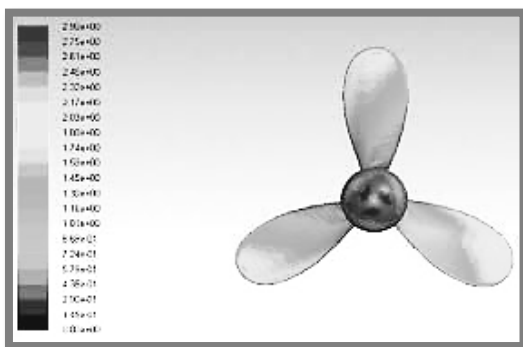

It is no accident that our Propeller accelerate faster, achieve the highest speeds, run smoother with no cavitation.

Custom designed

Every propeller can be designed to suit individual vessel operations to achieve maximum performance and efficiency.

Cavitation resistance

We have been actively engaging in research the causes and effects of cavitation on low-pressure areas under hull.

CFD and FEA Analysis

We can fully utilize CFD and FEA software to design the optimum propeller for any application.
